PROFILE

I'm a software engineer passionate about crafting beautiful and functional digital experiences. I specialize in UX/UI design, blending creativity and technical skills to design interfaces that truly connect with users. With experience in tools like Figma, React, and Angular, I focus on turning ideas into seamless, intuitive designs that make life easier for users. I'm excited to keep learning and creating designs that leave a lasting impact.

EDUCATION

Estuary Academic and Strategic Institut (INSAM)
Bachelor's Degree in Software Engineering (*Excellent*)
Bafoussam, Cameroon | 2022 – 2023

Estuary Academic and Strategic Institut (INSAM)
Higher National Diploma In Software Engineering
(HND) (*Excellent*)
Bafoussam, Cameroon | 2021 – 2022

SKILLS

Front-End Development

- Angular, React,Next.js, TypeScript, HTML5, CSS3, JavaScript, SCSS, Responsive Design, Material Design, TailwindCSS.

Design Tools

- Figma, Adobe XD, Sketch, Canva.

UX/UI Principles

- Responsive Design, Accessibility Standards, Interaction Design, Wireframing, Prototyping, Usability Testing.

Back-End Development

- NestJS, Node.js, Laravel,Next.js, PHP.

Database Management

- PostgreSQL, MySQL, MongoDB.

Cloud & DevOps

- AWS, Google Cloud, IBM Cloud, Docker, Git, GitHub/GitLab.

Project Management

- Trello, ClickUp, Discord.

Machine Learning

- Python (TensorFlow).

CMS & E-commerce

- WordPress (custom theme development, plugin integration).

PROFESSIONAL EXPERIENCE

Software Engineer Hello Computing - Germany November 2023 - Present

- Designed user-centric front-end interfaces using Angular and Figma to enhance UX for 1,000+ users.
- Engineered robust back-end services with NestJS, scaling performance by 30%.
- Integrated Docker, streamlining development, testing, and deployment processes cutting deployment times by 50%.
- Collaborated with with designers and developers to create wireframes and interactive prototypes.
- Adhered to agile practices, contributing to sprint planning and code reviews.

Junior Full Stack Developer CIA Consulting - Yaoundé, Cameroon June 2023 - November 2023

- Built dynamic interfaces using React a, improving UI interactions for client applications.
- Developed secure server-side logic with Laravel, optimizing back-end processing.
- Leveraged Next.js for server-side rendering and SEO optimization, reducing load times by 20%.
- Worked closely with senior developers, enhancing the development pipeline through efficient code reviews.

PROJECTS

Blood Donation Application: Personal Project

- Developed an app to connect blood donors with recipients, utilizing PHP and MYSQL for secure real-time data management.
- Implemented a location-based donor search feature, enabling faster connections and reducing response times.

Task Tracker Application: Personal Project

- Created a task management app for efficient to-do planning, leveraging Angular and MongoDB.
- Designed features for task prioritization, reminders, and collaborative planning, helping users manage productivity.
